

GRIP 31

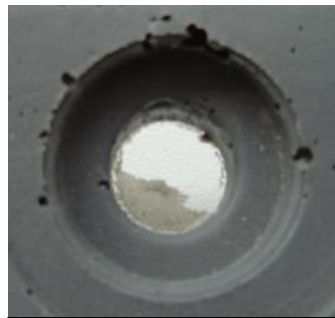

FLOW IMPROVER

GRIP 31 is specifically designed for application in rotational moulding operations.

It helps polymer flowing into difficult areas of the mold thus allowing to obtain parts with better profile, appearance and improved functionality.

GRIP 31 in particular:

1. allows to avoid pinholes;
2. allows to avoid voids and blowouts;
3. increases strength of inserts;
4. eliminates thinning and bridging problems.

No GRIP

GRIP eliminates voids and blowouts

APPLICATION

Spray **GRIP 31** directly into difficult areas of the mould.

PACKAGING

Carton boxes containing 12 x 500 ml. Aerosol bombs.
