F.IN.CO has developed a complete range of mould release agents for GRP and advanced composites designed for all kind of moulding technique (manual layup, RTM, infusion, vacuum bagging, prepreg, solid surface, etc.).

Beside the traditional sacrificial release agents, F.IN.CO offers a wide range of semipermanent release agents allowing multiple releases with only one application procedure and no transferring to the moulded surface.

Main application fields are: nautical, automotive, aerospace, industrial refrigeration, furniture, tanks and pipes, swimming pools, technical articles, mould making, etc.

F.IN.CO technical staff is very active in developing tailor made products to meet any specific demoulding requirement.
